RECAP: February 2018 Roundtable Meeting – Themes

IOWA SIM
State Innovation Model of Iowa

Prominent Themes

Healthy Communities

- Prevention is different than care coordination
- Focus on community-based prevention strategies
- Population health and social determinants
- Hierarchy of needs across health and non-health domains
- Population-specific levels of care coordination

Use and Sharing of Data

- Challenges of exchanging information real-time
- Bi-directional health information exchange at the point of service
- Restrictions in current regulations (e.g. HIV, behavioral health, and substance abuse information)
- Transparency needed for transformation at the service delivery level
  - Data or insight into tools (e.g. Value Index Score)
  - Capture Total Cost of Care (TCOC)

Healthy Communities

The Healthy Communities Workgroup will provide recommendations that:

- Define the attributes of a healthy community that focus on community-based prevention strategies, population health, and social determinants of health.
- Outline the partners needed to develop healthy communities such as health systems, public health, social services, and community organizations.
- Address unique aspects of Iowa and establish local parameters such as urban and rural.
- Create a 3 year road-map vision for developing health communities in Iowa that supports current assets from existing communities and includes strategies for breaking down silos.

Use and Sharing of Data

The Use and Sharing of Data Workgroup will provide recommendations that:

- Define the attributes of successful use and sharing of data including type of data, resource needs, information exchange needs.
- Outline the barriers to success for use and sharing of data and recommendations for overcoming barriers.
- Create a 3 year road-map vision for developing successful use and sharing of data.

Work of the Roundtable and Workgroups

Roundtable Vision

Working inside and outside the health care system, we will create healthier communities and transform the delivery and financing of care to enable all Iowans to live longer and healthier lives.

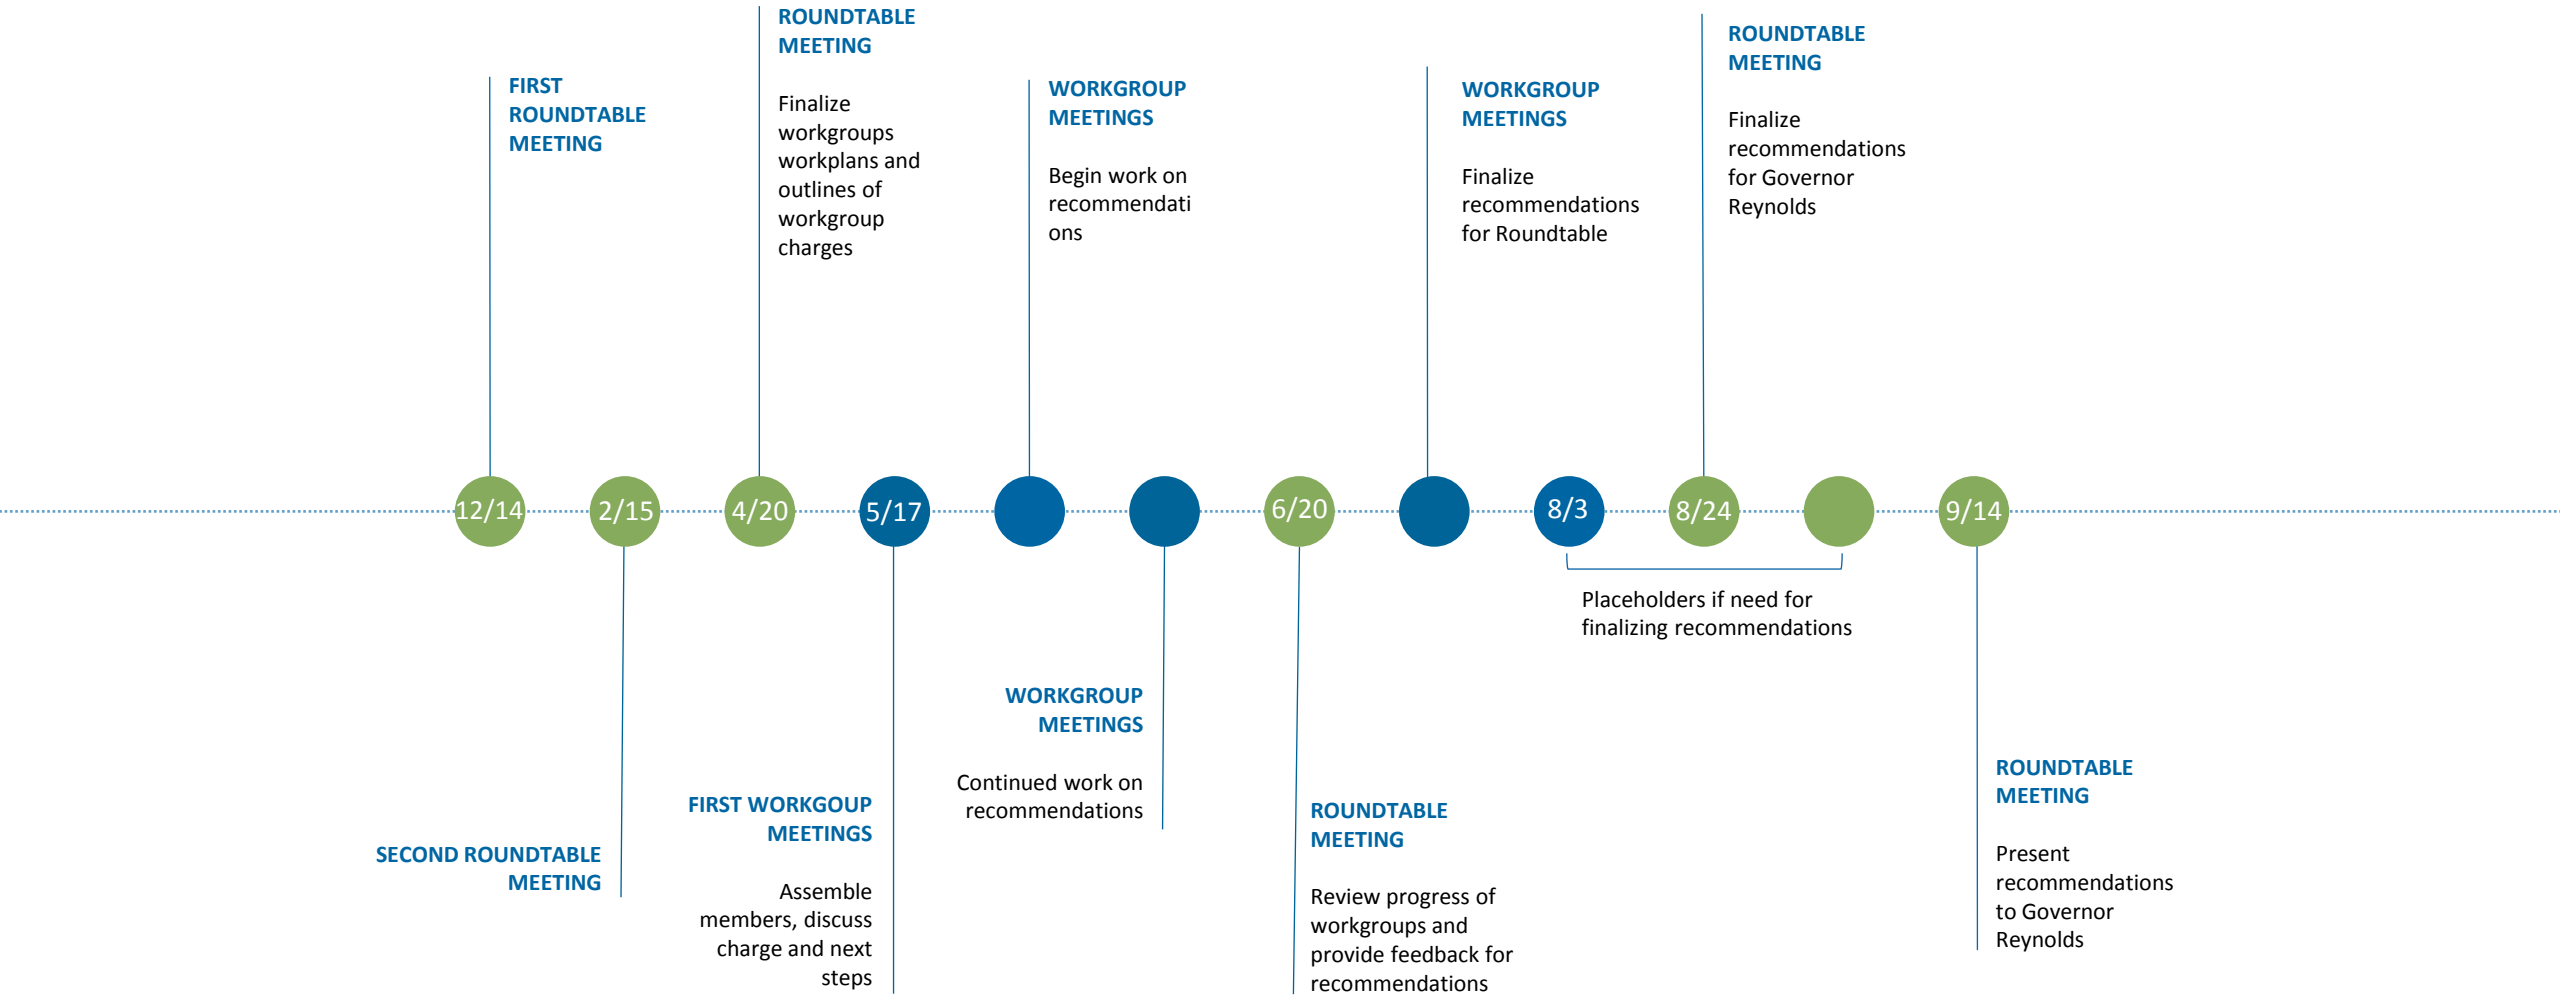
Roundtable Workgroups: Next Steps



IOWA SIM
State Innovation Model of Iowa

Roundtable Workgroups

Sponsor role

- Roundtable member that functions as liaison between Roundtable and sponsored workgroup
- Work with Department to develop workgroup charter and monitor progress of sponsored workgroup

Subject matter experts

- Subject-matter experts with technical proficiency in focus area
- Expected to attend meetings with decision-making authority and contribute to developing recommendations

Decision-making

- By consensus, using pillars/non-negotiables as filters for decisions
- Report recommendations to Roundtable through sponsor

Composition

- Participation limited to sponsor and 8-11 volunteers per workgroup
- Volunteers need to be submitted by April 27th

Timeline

- Workgroup meetings from May through July 2018
- Workgroup recommendations finalized in late July/early August 2018
